

## **Student employee (m/f/x) in the field of information technology (Legal Tech)**

You are a computer science student and would like to build a legal tech start-up in the field of data protection with us? You are interested in consent agents and other innovative solutions with which we can free humanity from cookie banners and similarly unusable "legal solutions"? You can imagine combining technology, law and business in such a way that we generate a competitive advantage - "from zero to one"? Then you've come to the right place!

The academic spin-off Law & Innovation (L&I) is seeking, subject to final approval of funding, a dedicated\*person for the period **from 1 November 2023**.

**Student employee (m/f/x)  
with a focus on computer science (from 3rd semester)  
(60 hours/month)**

As a student employee (salary depending on qualifications, initially limited until January 2025 according to the project duration), you will become part of our interdisciplinary team at [Law & Innovation](#). We are developing a consent agent and certification programmes with which consumers and companies can share and use personal data securely in the future. Follow-up funding with venture capital and an employee participation programme is planned for the period from January 2024. The place of work is Berlin, mobile working is possible by arrangement. The working hours are determined individually by arrangement.

### **What are your tasks:**

- You will support us with testing and operations of different versions of our consent agent.
- You support us in the documentation of the code and in the creation of a DIN Spec.
- You support us in the development of the start-up

## What you should bring along:

- Study of computer science in a higher semester
- Team-work experience (pull requests etc.) through projects or jobs
- Experience with automated software tests (unit tests etc.)
- Interest in using new technologies & architecture patterns
- Must Haves:
  - Experienced in working with the shell
  - Good JavaScript (better: Typescript) programming skills
  - HTTP REST is not unknown to you
- Nice to Haves:
  - first experiences with deployments
  - first experiences in web development, preferably with React
  - CSS skills
  - Experience with Chrome developer tools
- A precise way of working, a high degree of reliability and strong communication and organisational skills

## What we offer you:

- Work on innovative and forward-looking topics, including interdisciplinary exchange in our team and external network
- A very varied range of tasks with deep insights into everyday development in the field of legal tech
- A network with numerous national and international contacts in business, politics, law enforcement and non-profit organisations
- An attractive working environment with flexible working hours, flat hierarchies and enough room for your own ideas
- A highly motivated and very friendly team that enjoys interdisciplinary cooperation

**For application:**

Compliance with the guidelines for severely disabled persons is guaranteed. We promote professional equality! We welcome applications from all people, regardless of gender (f/m/x) and origin. Please submit your application with a short cover letter (in German or English), CV, certificates/references and your availability to [max.grafenstein@hiig.de](mailto:max.grafenstein@hiig.de). **The screening of applications will start immediately.** The call for applications will remain open until a suitable applicant has been found. The careful screening and selection of our new team members is very important to us and we ask for your understanding that we will conduct several selection interviews as part of the process. We are looking forward to meeting you.
